hundreds have signed the lists to serve.

GAS COMPANY WANTS
NOTICE OF PAVING

The Honolulu Gas Company takes
cognizance of an age long grievance
of all cities in wanting to be advised
in time of permanent street paving, so
that it may have its pipes in streets af-
fected put in durable and effective con-
dition before the paving is done, so
that it shall not have to bear the
odious of breaking into the finished
work. A letter from the company by
its manager, H. L. Strange, was read
at the meeting of the board of su-
pervisors on Saturday, asking that as
long a notice as possible should be
given to the company of any project
of paving of streets.

DISCUSSES PREFERENTIAL
SYSTEM OF VOTING

In answer to a query from Prof.
W. A. Bryan, of the College of Ha-
waii, City Attorney Henry Tupper,
of Grand Junction, Colo., has written an
interesting letter concerning the new
preferential election system used in
that and a number of other mainland
cities in connection with the commis-
sion form of municipal government.
He highly recommends the preferen-
tial election, explaining how it may
often eliminate the expense of a sec-
ond election, at the same time reduc-
ing the power of party and machine
politics in local affairs.

The preferential method provides
that in case any candidate, at a pri-
mary, receives a majority of all the
ballots cast he shall be declared elect-
ed, regardless of the number of other
aspirants in the field. Mr. Tupper
explains that the system is in vogue
at Pueblo, Colo.; Spokane, Wash., and
Duluth, Minn. Its chief opponents are
those who have formerly been able to
control elections by machine methods.
He adds that efforts are under way to
obtain the commission government in
Denver, and believes that within
twenty-five years most of the larger
cities will be using the preferential
system of voting.

sor Gilmore, Mr. and Mrs. Higgins,

"65" HUDSON
65 Motor Car.
To 38 Miles in 30 Seconds
from Standing Start.

Here is the Answer

to that oft asked question:

"What will Edward E. Coffin do when he builds a car?"

The "65" HUDSON answers the question everyone in
motorism has been asking for years. All know Edward E.
Coffin to be America's foremost engineer. His six famous
four-cylinder cars have a reputation for him which led all to
expect a wonderful new car.

But sizes are not like four, as many a designer has learned
to his sorrow. Mr. Coffin realized that and so instead of at-
tempting a six alone, he first secured as his associates, the
men who had already accomplished the most in six-cylinder
designing. His men came from the leading factories of Europe
and America. There are 48 in all—representing 97 leading
motor car manufacturers. Combined they know just about
all that has been learned in motor car building. So the "65"
HUDSON—Mr. Coffin's answer—is the composite of what the
most successful builders working together have accomplished.

Electric Self Cranking Electrically

The Best Car They Know

It is smooth and flexible—the qualities for which sizes are
really built, and which experienced men seem unable to
obtain in the sixes they build.

It is powerful—speedy, beautiful, safe and comfortable.
Simplicity is a notable feature, and economy in operation is
accomplished as it is in but a few cars.

Not Just Two Cylinders Added
to a "Four"

Adding two cylinders to a good four won't even make a
poor six. Four and sixes are entirely different. That is why.
